

Ecological Risk Assessment Conceptual Site Model

- Legend**
- Complete and significant pathway
 - ⊗ Incomplete pathway
 - ⊙ Complete and insignificant pathway
 - Complete and significant unknown

Notes: (a) Include exposure media with at least one complete pathway evaluated in the BERA.
(b) TZW = transition zone water.

Exposure Media ^(a)		Exposure Routes	Receptors										
			Benthic invertebrate community, bivalves, and decapods	Omnivorous fish	Invertivorous fish	Piscivorous fish	Detritivorous fish	Omnivorous birds	Sediment-probing invertivorous birds	Piscivorous birds	Aquatic-dependent carnivorous mammals	Amphibians and reptiles	Aquatic plants
